FOR SALE—Edison Travellers' Moving Picture Outfit, complete.—Apply at Miner's office.

Rev. James Sargent will conduct Baptist service in the Oddfellows' hall, Coleman, on Sunday at 11 a.m.

C. W. Smith was in town from Fernie this week.

H. Bates, of Macleod, was here from Macleod on Tuesday.

E. Disney was in town from the Royal Collieries, this week.

Thomas Burnett and D. C. Mackenzie of Bellevue, came to Coleman on Tuesday.

Inspector Belcher of the R. N. W. M. P. was in town from Pincher Creek this week.

Mrs. D. J. Hill arrived in town this morning after a three months' trip to the old country.

Alex. Cameron has been appointed returning officer for this district during the provincial elections.

Eddie Morino, who has been agreed upon to referee the big boxing contest in the opera house here on Tuesday night next, is at Blairmore.

Amongst those who came from Pincher Creek to attend the institution of the Rebekahs here on Tuesday night were Dr. Gillespie and F. W. Lindsay.

BORN—At Coleman on the 7th inst., a son to Mr. and Mrs. J. O. C. Macdonald. At the same place on the same day, a son to Mr. and Mrs. Hugh Dunlop, which was still-born.

The Monte Cristo show at the opera house on Wednesday last was well enjoyed by the large number present. It was decided one of the best shows that have ever played in Coleman.

The members of the Coleman band wish to announce that they will give a moving picture entertainment in the opera house on Monday next. This is for a good cause and should receive liberal support from the people. Dancing after the show.

Special evangelistic campaign affecting points between Pincher Creek and Nelson, will commence April 4th. Coleman is to be favored with two able workers who will carry on the work in the Institutional church.

A press despatch from Nelson, B. C., under date of 8th inst., says: "Navigation opened up today for the first time since the freeze-up in January, the steamer Kaslo, from Kaslo forcing her way through the ice and reaching port today."

The lovely summer weather which Coleman has been experiencing during the last several weeks have given some women a desire to wear their "summer whites," and the only thing which prevents them from putting this matter into practice is the early part of the year.

On Tuesday evening whilst D. J. Hill was attending the ball given by the Rebekahs he had the bad misfortune to slip and fall heavily while descending the stairs leading from the hall to the room below, severely injuring his right shoulder blade and has since been compelled to remain in bed.

LOANS TO SETTLERS

The following is taken from the Conservative platform as adopted in convention at Red Deer on February 12th and 13th:

This convention pledges the Conservative party to the advocacy and support of the legislation which will enable government aid to be granted towards the making of loans to settlers and workers at a low rate of interest or legislation along the lines of that enacted in this respect in Australia and New Zealand.

The financial needs of settlers are well known, and if the government is able to afford relief without involving itself in embarrassing obligations it should do so. The lending of money to settlers on easy terms finds ample precedent in New Zealand and Australia. New Zealand began it in 1901. This was a time of widespread industrial depression and settlers and farmers generally were finding it difficult to procure money and interest was high. The government was able to borrow for 3 and 3/4 per cent., and it occurred to the government that it could borrow at that rate, it might in turn become a lender.

In 1904 an act was passed empowering the government to borrow \$15,000,000. In the following year a 3 per cent. loan was floated in London. This loan was loaned on first mortgage on land used for farming, dairying and market gardening, no loan being less than \$125 nor more than \$15,000. Loans are of two kinds, fixed and instalment—the first being for a short and the second for a long term. Payments are made half yearly; the rate of interest is usually 4 1/2 per cent. The average loan is \$1,500. In this way more than \$15,000,000 has been loaned to New Zealanders at 4 1/2 and 5 per cent. The system has been very profitable to the government, the net proceeds being about \$250,000 a year. One of the great advantages is that the borrower saves the payment of commission and many other charges, payments being made through the post office. Several of the Australian states have followed the example of New Zealand, i.e., West Australia, South Australia, Victoria, Tasmania and New South Wales; in these states the loan is repaid by a sinking fund of 600.

The conditions under which money is loaned to the settler in this province bears very heavily upon him. Not only must he pay from 8 to 12 per cent., but the expense of applying the loan reduces the amount he actually receives by \$50 or \$40. Government loans, by eliminating the middleman, would reduce their cost to the borrower.

A NEW BUSINESS IN COLEMAN

As was announced in our last issue, Mrs. Rogerson, of Winnipeg, opened her millinery parlors yesterday (Thursday) in the Barrows' building, opposite the opera house, where she has a large number of the latest eastern styles of hats. A golden opportunity now awaits those women who desire a well-made, neatly-trimmed hat, for Mrs. Rogerson has in stock many Parisian beauties to suit one to suit another. Mrs. Rogerson is undoubtedly a milliner who very clearly understands her work, having held important positions in some of the large eastern millinery stores, and Coleman in particular and the surrounding district in general are very fortunate in having a milliner of Mrs. Rogerson's standing. As there is no milliner at Blairmore or Frank, Mrs. Rogerson should be able to get a large patronage from those two places as well as from Coleman.

J. E. Woods, of Pincher Creek, was in town this week.

Early yesterday morning Miss Julia Binkley, of the Coleman hotel staff, was informed by telephone of the death of her father at Lacombe, of heart disease. Miss Binkley left on the local for Lacombe.

About 8 o'clock on Wednesday morning whilst Paul Rhodes was spragging cars in the mine, some of the cars jumped the track striking him on the leg and causing a fracture of the same. He was immediately taken to the hospital and it is hoped that a speedy recovery will follow his mishap.

The Eye Opener is out again in full bloom. Poor Cushing seems to be the trouble.

REBEKAHS ARE HERE

instituted on Tuesday With a Membership of 94—Ball in Opera House—Grand Success

If secret societies are helpful in promoting true friendship, Coleman should be an ideal place to live in, for it is difficult to find any other town of Coleman's age and size that has more secret societies than what there are in Coleman. The ladies have for several months been seriously considering the matter of instituting an order to which the good ladies of this and other towns may be admitted. A charter was soon applied for and other arrangements were completed and the announcement made that an order known as the Rebekahs would be shortly instituted here. This great event transpired on Tuesday evening last, when people flocked from all parts of the district to participate in the institution.

At 7:30 p.m. the lodge was called to order by the instituting officer, E. Foster Brown, P. G. M., P. G. R., of Macleod. He was also assisted by Mrs. T. Hinton, G. C., of Pincher Creek, and H. Bates, P. G., of Macleod. The following degree team from the Esther Rebekah lodge of Fernie instituted the lodge here: Sisters F. Vance, N. G.; Carlson, R. S. N. G.; Duthie, L. S.; Ferguson, chaplain; Beck, P. N. G.; Hanson, conductor; Letcher, warden; Macleod, V. G.; Murrie, R. S. V. G.; King, L. S. V. G.; Gales, S. G. The instituting officers were all ladies and performed their duties very satisfactorily, being a credit to themselves and their lodge.

A considerable amount of work had to be done and so each one got busy. The large number of eighty-nine members were initiated and five were admitted by card, thus swelling the number to NINETY-FOUR. What a surprising number of members to have on the night of institution. This lodge is the first lodge in the district to be taken in the lodge and speaks well of the good work done by members of the L.O.O.F. and their female helpers. The new lodge was named Victoria Rebekah lodge, No. 6. The officers elected were: Sisters C. Dunlop, N. G.; D. G. Stafford, V. G.; Bro. J. O. C. McDonald, R. S. N. G.; Sisters W. P. Nelson, L. S.; F. Jones, R. S. V. G.; W. Hanson, L. S.; E. Escott, warden; O. Hatfield, I. G.; Bro. C. Dunlop, O. G.

The charter members were: Sisters D. G. Stafford, J. Stafford, C. Dunlop, F. Jones, J. Hatfield; Bros. J. O. C. McDonald, H. Clayton, E. Matthews, E. Hines, Wm. Geddis and F. Swan. There was a large contingent of candidates and members in from Pincher Creek, Frank, Blairmore, Michel and Fernie.

After the institution service was over the members repaired to the opera house where the floor manager, Mrs. D. J. Hill, had everything in readiness for those who wished to touch the "light fantastic" upon the floor. About three hundred danced to the strains of Crawford's orchestra. About 12:30 the dainty refreshments which awaited them in the rooms beneath were served, after which dancing was resumed and it was not until about 5 a.m. when the happiest event that has transpired in Coleman for a long while came to an end.

Let us hope that the good work will go on, that this new lodge will help along the good work already started by other friendly organizations in this town. It is rumored that the Macabes will shortly institute a lodge here. Last Tuesday was the first annual celebration of the subordinate lodge L.O.O.F., being instituted here on March 9th, 1908.

BLAIRMORE

Blairmore, the home of politicians.

The town is full of lumber jacks these days.

It is rumored that Bert Stenman intends moving to Michel, B.C.

BORN—On Monday last, to Mr. and Mrs. Dan Sinclair, a daughter.

W. A. Beebe attended a meeting of the railway committee at Lethbridge this week.

Mrs. J. M. Costin, of Gillingham, spent Monday in town as the guest of Mrs. Douglass.

Miss M. Sunstrom returned last week after a few months' visit to her old home in Ottawa.

Charles Christman, who had an eye badly injured while working in the mine, is fast recovering.

WEDDING BELLS

A very quiet wedding took place at Christ church, Fernie, at 2:30 on Tuesday afternoon last when the Rev. R. S. Wilkinson united in marriage T. W. Wilkins a resident of Coleman, to Miss Nora G., second daughter of R. M. Sample of Rytton-on-Tyne, England. Wesley Johnson acted as best man while A. F. Davies gave the bride away. After the marriage ceremony was over the wedding party repaired to the Waldorf hotel where a very pleasant evening was spent. This being the first wedding to be celebrated at this hotel since the fire. The happy party returned to Coleman on Wednesday morning and will make this town their future home. Mr. Davies is well and favorably known all through the Pass; he is one of Coleman's thriving contractors and builders and is the sort of fellow that Coleman might well feel proud of. This paper joins with their many friends in wishing them many years of happiness and prosperity.

WOODS VERSUS BURROWS

The fifteen round boxing contest which will be pulled off here on Tuesday night next is creating quite a lot of talk amongst the sporting element and a large number all through the Pass is greatly interested in the affair. Both boxers feel confident of winning. Sailor Woods claims that he is just as good at the work now as he was when he held the championship of the British navy, while Charlie Burrows says that he is in the best of condition.

NOTICE

H. E. Lyon, Conservative candidate, wishes to meet the Socialist and Independent candidates or their representatives to arrange for joint meetings throughout the Pass. Phone 44.

FIRE AT SLAV TOWN

One House and Contents Destroyed—Firemen Saved Other Buildings.

At 2:30 on Saturday afternoon last the fire bell sounded and the fire brigade was called out to fight a fire at Slav Town which started in "the big white house." Our alert firechief and his men promptly responded to the call and they were followed to the scene of the great conflagration by a large number of citizens, but when the firemen had arrived the flames had secured too great a control over the building to allow the firemen to do their work and in less than twenty minutes after the alarm was sent in the building was burned to the ground. The fire started by some unknown means in the hall on the ground floor. As soon as it was discovered all the inmates of the house were informed and they immediately hurried from the building, some with nothing more than the clothes they wore. After seeing that the fire had gained such headway and that there was no possible means of saving the burning building, the fire chief whose vigilant eye saw some sparks carried by the wind from the seat of the fire to other buildings, was soon busy with his men in keeping a continual flow of water over those buildings and preventing them from being destroyed.

A Slight Misunderstanding.

A lady from South America, possessed of a decidedly queer temper, came to New York with a very incomplete knowledge of the English language. At her hotel she rang for the chambermaid. But a waiter came instead. Having ascertained that the name of the chambermaid was Susan, the lady marshalled her meagre knowledge of English in a desperate effort to make the waiter understand that he should call the chambermaid. What she said to him, however, was—

"Call me Susan!"

The waiter leaned against the wall much alarmed.

"Call me Susan!" shouted the South American.

"Call me Susan!" roared the lady, her eyes flashing furiously.

"Susan, then—if you will have it!" exclaimed the poor waiter. Then he fled precipitately.

ACUTE INDIGESTION

Cured Through the Timely Use of Dr. Williams' Pink Pills

There is no medicine can equal Dr. Williams' Pink Pills for stomach troubles. These Pills are not an artificial appetizer nor a stimulant. They act in nature's own way by making rich, red blood. This new blood gives vigor to all the organs. When it flows through the tiny vessels in the body, it stimulates them and creates that craving which people call "appetite." Then, when the food is taken with food the blood gives the stomach strength to digest it. The nourishment is absorbed by the blood, and carried to every organ in the body. This is how Dr. Williams' Pink Pills cure indigestion, and all blood troubles. That is how they create strength and vigor, worn-out people.

Mr. H. Thomas, Curry, Port Maitland, N.S., says:—"About three years ago I was attacked with what the doctors termed acute indigestion. The first indication was a bad taste in my mouth in the morning and a yellow complexion. Later as these symptoms developed, my tongue was heavily coated, especially in the morning, and I felt particularly dull. My appetite began to dwindle, and even a light meal left me with some uneasiness. I ate too much. As I grew worse I ate barely enough to sustain my body but still experienced the most acute pains. A wretched languor came over me which I could not throw off. It seemed as if I were always tired, with little strength and frequent violent headaches. The remedies given by my doctor, as well as many others, failed to give me any relief to relieve me. I was in this very unhappy state for almost a year when I read in a newspaper one day of the cure of a case much like mine through the use of Dr. Williams' Pink Pills. This decided me to give these Pills a trial. It was not long before I felt some relief from the distress after meals, and as I continued the use of the Pills all my troubles, including indigestion and headaches left me and I began to enjoy increased energy and new strength. To-day I am well and content, enjoying the best of health, with never a twinge of the old trouble, and I attribute my cure entirely to the fair use of Dr. Williams' Pink Pills.

These Pills are sold by all medicine dealers or you can get them by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

DEATH OF THE WORLD.

When Water Disappears and Air Gets Too Thin to Breathe.

The age of the earth is placed by some at 500,000,000 years, and still others of later time place it at 10,000,000 years. None place it lower than 10,000,000, knowing what processes have been going through.

Other planets go through the same process. The reason that other planets differ so much from this is that they are in so much earlier or later stages of existence. The earth must become old.

Newton surmised, although he could give no reason for it, that the earth would lose all its water and become perfectly dry. Since then it has been found that Newton was correct.

The earth keeps cooling it will become porous, and great cavities will be formed in the interior, which will take in the water. It is estimated that this process is now in progress, so far that the water diminishes at the rate of the thickness of a sheet of paper each year.

At this rate in 6,000,000 years the water will have sunk a mile, and in 10,000,000 the water will have disappeared from the face of the globe.

The nitrogen and oxygen in the atmosphere are also diminishing all the time. It is in an inappreciable degree, but the time will come when the air will be so thin that no creature we know could breathe it and live. The time will come when the world cannot support life. That will be the period of old age, and then will come death—Richard A. Proctor.

"CREASING" A WILD HORSE.

For One Captured by That Method Fifty Were Killed.

Will C. Barnes, writing in McClure's of the various methods of capturing wild horses in the old days on the plains, says:

"Creasing" was one of their devices. This consisted in shooting a bullet so that it struck the animal on the top of the neck just in front of the withers and about the neck of the animal to the spinal column. The shock temporarily stunned the horse, and the hunter ran up and tied the animal's feet together before he recovered. A rope halter was slipped on the animal. A gentle horse or sometimes a work ox was led up alongside the prostrate beast, and he was securely necked up to the gentle animal and thus could be handled easily. Old mustangers say, however, that for one horse caught this way fifty were killed and that as many as a hundred were killed in the process. The method was not used very much except in an emergency, when a hunter, after days of attempts to capture, finally took the risk of creasing an animal rather than let him escape altogether.

"One of the best cow ponies I ever owned I bought from a mustanger who had creased him in the east of the Pecos river in New Mexico. There was a hole in his neck fully two inches deep and wide, where the ball from the heavy buffalo gun had plowed its way through the flesh just high enough above the spine not to kill and low enough to stop effectively."

India Ink.

In both India and China there are thousands of people who manufacture India ink as a side line to their regular business, working at it in the winter at night and on days when they are not otherwise employed. It is made by burning some kind of oil in a lamp with a very long chimney, usually made in joints which can be taken apart for greater convenience in cleaning out the soot which makes the ink. Almost any kind of vegetable oil will do for this purpose, but where petroleum is found even coal oil is used in making the cheaper grades. The best kind is made from sesame oil—Argonaut.

His Hand.

Tom Reed was playing whist on one occasion in his club in Portland. One of the party whom the "sea" did not like extravagantly had a habit of carrying a good deal of black rubber under his finger nails, and the rest of his hands never looked clean. But the fellow had good luck, which used Tom. Finally, almost unable to conceal his impatience, the giant speaker of the house of representatives remarked in his metallic nasal tone of voice, "Blank, if dirt was trumps, what a hand you'd have!"

A Terrible Threat.

"You are a poor little son-in-law holds threats over you?"

"Yes," answered Mr. Cunroff. "He has us where we can't give him any argument at all. Mother and the girls say we must yield for the sake of the family honor."

"Is there—er—a skeleton in the closet?"

"Not at all. He simply announces that unless he has his own way he'll get naturalized and be a plain American citizen."

Highly Esteemed.

"Do you find that most people nowadays worship money?"

"No; I won't go as far as that," answered the home grown philosopher, "but I will say that the love of money is seldom platonic."

Limited Love.

"When your parents refused you your hand, I was so wretched that I wanted to throw myself out of the window."

"And why didn't you?"

"It was so high!"—Lustige Blätter.

The Nerves Not Understood

By most people and by many doctors—Hence their treatments fail.

The best authorities now agree that restoring the nerves is the only rational and successful means of cure.

It is not so very many years since diseases of the nerves were attributed to the presence of evil spirits and more recently sufferers from nervous derangements have been told that they only imagine they are sick.

When Dr. Chase's Nerve Food was first put upon the market as the only natural and effective method of curing derangements arising from exhausted nerves it was considered almost revolutionary but its success was remarkable from the start, and many who used it being cured of such severe forms of nervous trouble as locomotor ataxia and partial paralysis.

Now the very best authorities claim as did Dr. Chase that the only way to cure diseases of the nerves is to make the blood rich and nutritious and to build up the wasted nerve cells by such treatment as Dr. Chase's Nerve Food.

Dr. W. B. Sutherland, St. Andrews, Man., writes: "In 1903 I was stricken with paralysis, fell helplessly to the floor and was carried to my bed. The doctors pronounced it a bad case as I had no power in my tongue and left leg. For six months I lay in bed without hope. Without benefit from the doctor's prescriptions. My husband advised me to try Dr. Chase's Nerve Food and by use of this treatment all the symptoms disappeared. I can now talk plainly, my leg is all right and I can do all my own household work. I am grateful to be cured by so wonderful a remedy."

The Uses of Coal Dust.

Only 50 years ago the dust of coal was considered to be entirely useless, but since then a great change has taken place, and at present in England alone about 1,000,000 tons of district alone produces 3,000,000 tons of briquets each year. Up to the present time coal tar has been used for making coal briquets, and its production in the past 10 years has increased about 100 per cent.

Bickle's Anti-Consumptive Syrup is an unparalleled remedy for colds, coughs, influenza and diseases of the throat and lungs. The fame of the medicine has spread throughout the world in eradicating these affections, and in protecting mankind from the ravages of colds, consumption, and a neglected cold leads to consumption, one cannot be too careful to fight it in its early stages. Bickle's Syrup is the only one that will do it.

Griff—You look prosperous, old man.

Grafton—Yes, I suppose you read about my North's ambition to be a Senator.

Griff—Well, yes; I see by the papers that he says he's in the hands of his friends.

Grafton—That's it. I'm one of his friends.—Catholic Standard & Times.

Repeat it—"Shiloh's Cure will always cure my coughs and colds."

China's Early Paper Money.

As in many lines of industry, China led the way among the nations in the use of paper currency in business. Since the fifteenth century, however, no paper money has been issued in the Celestial empire, and it is due only to China's industrial and commercial growth that the government has recently appointed a commission to investigate the matter.—System.

High Priced Fish.

A member of the Aquarium society of Philadelphia is an organization for the breeding of fancy fish, recently received a diploma for a particularly fine goldfish. The glistening, scarlet, thing weighed less than two ounces, but an offer of \$100 was promptly made for it. Fish at nearly \$1,000 a pound—think of it!

Comfort for the Dyspeptic.—There is no ailment so harassing and exhausting as dyspepsia, which arises from defective action of the stomach and liver, and the victim is to be pitied. Yet he can find ready relief in Parmelee's Vegetable Pills, a preparation that has established itself in the hearts of effective use. These pills that are widely advertised as the greatest ever compounded, but not one of them can rank in value with Parmelee's.

Approves of the Fighters.

"Ernest Schwabachman should have a picture of John L. Sullivan, James J. Corbett or some other great man hanging on its walls to show the boys what physical development means," said Dr. Walter Cornell, assistant medical inspector, in an address on "Physical Defects of Children" recently delivered at the normal school. Thirtieth and Spring Garden streets, and in the work by suggestion. Opposed to the statue or picture of John L. Sullivan I should suggest a representation of a physical wreck, just to give the youngsters a demonstration of both extremes.—Philadelphia North American.

There was an audible titter among the teachers when the speaker pronounced the names of these prize ring heroes.

"Yes, I mean it," Dr. Cornell said emphatically. "They ought to be held up as examples of physical fitness, just in the same way that we hang up 'God Bless Our Homes' notices. They'd work by suggestion. Opposed to the statue or picture of John L. Sullivan I should suggest a representation of a physical wreck, just to give the youngsters a demonstration of both extremes.—Philadelphia North American.

ART AND WEATHER.

A Storm That Suited the Painter, but Not the Committee.

In a gallery there hangs a large picture of a storm. The artist, Dr. painting shows a waterfall in one of the states famous for startling natural scenery. The picture has occupied its present place for several years.

"Does it being here asked a visitor of the man in charge.

"No more than the others you see."

"Seems to me it should be in the capital of the state where this scenery is," said the visitor.

"It was painted for the state," replied the man in charge, "but when it was submitted to the art committee it refused to accept it."

"What was the objection?"

"You see the sky is overcast. The artist put in a gathering storm like an impending calamity. The art committee said it was a reflection on the reputation of the state; that a storm such as is represented was unknown in that latitude."

"Couldn't the artist put in another sky, one that accorded with the state's reputation for sunshine?"

"I suppose he could, but he refused. The art committee said that the storm effect on the canvas, and he refused to budge. He sent it here, and here it remains."

WILD MACEDONIA.

Strenuous Life Amid Savage Animals in the Balkans.

Besides some warlike men Macedonia contains an abundance of wild animals. A traveler writes: "By the side of oaks and walnuts you find great tortoises and snakes eight feet long, and bears and wolves abound. The most serious danger to the traveler, and even in civilized Bulgaria it has lately been found necessary to increase the government rewards for killing them. I believe it to be a true story that a party of peasants with horses was not long ago wholly destroyed by wolves in the Mori Hovo mountains, nothing but the bits and iron being found to record them."

"In the same hills the peasants migrate for the summer to lofty shoulders where the land is flat enough to grow little wheat and here, night after night, they will sit up with a rifle to drive off bears. There are tragic stories of women with babies in their arms beating off bears with their hands."

"The prevalence of eagles is a delightful feature for the traveler, and on the cliffs of Montenegro I once saw at the same moment thirty-nine ravens."

The Missing Link.

A lawyer's office in a Philadelphia building wherein there are some hundreds of tenants recently lost a cuff link, one of a pair that he greatly prized. Being absolutely certain that he had dropped the link somewhere in the building, he caused a notice to be posted in the following terms:

Lost—A gold cuff link. The owner, William Ward, will deeply appreciate its immediate return."

That afternoon on passing the door whereon this notice was posted what were the feelings of the lawyer to observe that appended thereto were these lines:

"The finder of the missing cuff link would deem it a great favor if the owner would kindly lose the other link."

Not Included.

After the dry goods salesman had completed a business with Cyrus Craig, Centerville's one storekeeper, he asked what was going on in the town.

"Had what entertainments this season?" he inquired.

"No," said Mr. Craig. "Not one. Salome Howe's pupils have given two concerts, piano and organ, and the principal of the academy has lectured twice on 'Our National Government' and once on 'Stones as I Know Them,' but as far as entertainments are concerned Centerville hasn't got round to 'em yet this season."—Youth's Companion.

Care of Snowshoes.

Snowshoes need very little care. You don't have to wipe them dry with a cloth, for instance, the prescribed treatment for skates. When taking them off merely pat them against the wall or a tree to shake free the clinging snow and stand them up on their heels outside. Never attempt to dry them before a fire. When they are put away for the summer select a dry place where there will be no danger of mice.—Country Life in America.

The Age of the Microbe.

People just now are living in a state of almost morbid apprehension concerning what they should eat and drink. There have been the paleolithic age and the red sandstone age. The present age would come to be known as the bacillus, microbe and tubercle age.—Lord Riddlebale in House of Lords.

What It Does.

"Speaking of 'victory' does the modern school make us think?"

The Dean's Pet Spider.

To his particular passion for angling—and he has many record catches to his credit—and his general fondness for all animals, Dr. Barker, the Dean of Carlisle, has now added a partiality for spiders. His pet insect is one which Mrs. Barker discovered in an ante-room of the deanery, and there at present it is allowed to remain. Unlike most ladies, Mrs. Barker is specially fond of spiders, as well as birds, and it is a pretty sight to see her in the garden each morning surrounded by sparrows, song-tits, robins, and ravens, who collect round her when she whistles and allow her to feed them with suet, meat and bread.

Fight Between Child Card-Players.

It was stated at the Ballyboy (Ireland) Petty Sessions that while four children were playing cards with a toy pack, and with pieces of broken china for stakes, they quarreled, and two of them, who were under six years of age, were badly injured. One of the children lost an eye.

It Bids Pain Begone.—When neuralgia attacks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil.

"Well rubbed in it will still the pain and produce a sensation of ease and rest. There is nothing like it as a liniment for rheumatism, sciatica, neuralgia, etc. A trial of it will establish faith in it."

Teacher—And what do you suppose all the animals did during those forty days in the ark?

"Smarty" Williams—They just loafed around and scratched themselves.

"Sandy" O'Toole (disdainfully)—Chuck it, Smarty! What'd they scratch for when there was only two feds—The Bohemian.

Repeat it—"Shiloh's Cure will always cure my coughs and colds."

When Christian Science began to find firm footing in Winchester, the little son of a prominent woman, who well understood the faith and was urging others to take it up was out of school a day or two because of sickness. When the youngster returned his teacher, who was well and in years and possessed an inquiring mind, engaged the youngster in conversation.

"Been sick, Joe?"

"Yes'm."

"Sick enough to be in bed?"

"Yes'm."

"What did your mother do for you, Joe, while you ached in bed?" asked the teacher, now all expectancy for the reply.

"No," said Mr. Craig. "Not one. Salome Howe's pupils have given two concerts, piano and organ, and the principal of the academy has lectured twice on 'Our National Government' and once on 'Stones as I Know Them,' but as far as entertainments are concerned Centerville hasn't got round to 'em yet this season."—Youth's Companion.

Not Included.

After the dry goods salesman had completed a business with Cyrus Craig, Centerville's one storekeeper, he asked what was going on in the town.

"Had what entertainments this season?" he inquired.

"No," said Mr. Craig. "Not one. NEGLECTED SCALD CAUSED MONTHS OF AGONY.

Spent Dollars in vain but Zam-Buk Cured Her.

Following we give the testimony of a lady who told her husband of Zam-Buk earlier would have been saved nine weeks of agony.

Mrs. Frederick Bryant, of 109 Railway Avenue, Stratford, Conn., says:—"I scalded my foot while preparing supper. Next day the skin came off and my foot was in a serious condition. I could not wear my shoe and had to lay up for nine weeks. During that time I used dozens of salves, but none did any good, in fact the wound developed into a running sore. I got no rest day or night from the pain. At this point a supply of Zam-Buk was obtained and a few applications had immediate effect in soothing the pain and irritation. A small supply proved sufficient to heal the scald, although I had spent dollars in other remedies. New skin has now formed nicely over the open sore."

"Zam-Buk is the most wonderful and effective remedy I have used, and I advise others to use it."

Zam-Buk is equally effective in curing burns. Mr. Geo. Gilmore, caretaker of the Glen Block, Winthrop, Me., testifies as follows:—"I sustained a series of bad burns while attending to the large furnace which heats the buildings. One burn on my wrist was particularly bad and gave me great pain. I applied some Zam-Buk, and in forty-eight hours all that remained of the burn was a slight scar. Zam-Buk seemed to take the pain away like magic. It is a splendid balm to keep handy, its healing powers being simply marvellous."

There is nothing to equal Zam-Buk as a family balm. Its uses are as wide. It has been proved a sure cure for eczema, ringworm, ulcers, abscesses, piles, bad leg, suppurating wounds, cuts, frosts, chapped hands, cold cracks, and all skin injuries and diseases. Rubbed well into the part affected it cures rheumatism, sciatica, neuralgia, etc. All druggists and stores sell at 50c. per box, or post for them at Twenty-Buk Co., Toronto, on receipt of price.

Rivers was explaining the operation of the new noiseless gun, as he understood it.

"It's like this," he said. "There's a corrugated compartment called the 'silencer,' and the 'pull' of the gases in trying to escape not only prevents all noise, but eliminates the recoil and the gun doesn't kick."

"There's nothing strange in that," said Brooks. "If I had a pull I wouldn't kick either."

Wife—Is there any difference between a fort and a fortress?"

Husband—Not much, except, of course, that a fortress must be harder to silence—Lippincott's.

A Natural Laxative

Inward cleansing is as necessary as outward bathing. To keep the bowels free and regular is of even greater importance than to keep the skin-pores from becoming clogged. The neglect of either invites disease. Everyone needs a natural laxative occasionally, to free the bowels of accumulated impurities. For this purpose take

THE REDISTRIBUTION

AND GERRYMANDER

The basis of any redistribution scheme should be governed by some standard of measurement and this must be in the nature of things sufficient and necessary. Does the redistribution of the Rutherford administration just effect a come up to the forementioned standard? Then what must have been the object aimed at by the administration of Alberta? Had they a desire to so arrange the voting power of each riding that they all sit in a measure like the elections in order, with a degree of assistance, to reckon on being returned again to look after the interests of the people? In thought to forestall the action of the people at the polls by forcing them to act in masses along a particular groove marked out for the electorate by their moribund representatives. We can see on other fensible construction to be put upon this gerrymander, for it is assuredly such, that that the Rutherford administration was afraid of the handwriting on the wall, "Weigh in the balance and found wanting." If mostly of purpose, honesty of action, and honesty of thought, we fear could not be attributed to this splendid piece of machine work. This more carefully you examine it and the more consideration you give it, the less honesty of purpose you discover in it. Just at this stage of the campaign it seems that the manipulation of these ridings is such that it is self-evident a landslide will carry any party in its onward course. The authors of this curious anomaly.

In Isaac Newton, when a boy attending school, up to a certain time had shown no great aptitude for study. One day the boy above him in the class kicked him in the stomach. Newton immediately resolved to study and so diligently did he apply himself that he soon stood head of his class. Thus he avenged himself of the bully of a few years ago. One of the brightest of intellects. After a similar way the past administration has kicked the constitutional procedure of redistribution and the people being the masters of that will now proceed to place another party as leader in the state. That self-satisfied patronizing spirit that the past party in power have shown is soon to be changed and another wielder of parliamentary procedure is soon to place them. Governments and administrations that are not capable of seeing clearly the folly of attempting to belaud an issue must pay the inevitable penalty brought on by neglect of ordinary caution in trampling underfoot the vested rights of the people.

State craft in the light of present day knowledge and quickness of thought has much to fear, if not conducted with due regard to the interests of the masses. That time is long since past when the public mind can be lulled by any set of professions however profuse. Genuine law making and adjusting is not brought about by a huge arrangement of words. The varied interests of the masses keep a sharp eye on every feature of legislation and analyze and observe, with a critical and judicious mind that is unerring in its scope. The name of a party is now no longer a guarantee that the legislative work is beyond reproach. To ensure such a stage there must be in the party individual capacity of mind sufficiently comprehensive and incisive to grapple with the greatest ideas and also analyze the slightest details. Such a mind is possessed by what we term a statesman. Diplomatic and plausible, yet yet without accumulative and all absorbing passion for every phase of law making and law administration. Such an individual is not found on every prairie or mountain side. Nature has not planted them in every island grove. One such is a rare find. The glorious perception of a man placed among men endowed with all the powers and conceptions of masterfully dealing with the trivial affairs of men--this is the ideal statesman. Is it possible among all the aspiring legislators of the time to find one such? If such an one were here, then such paltry affairs as gerrymandering would be a thing of the past. The inherent genius of the individual should be sufficient for the task.

If such a lofty conception is not to be realized now, surely it should be our aim to strive after it at least. If the little tickling of the masses against individualism ceased and the collective energies thus wasted were shaped along the forefetched higher conception, might we not with the amount of mind now at our disposal arrive at the higher plane of statesmanship? This reached, we should not need to resort to any of these trivial workings such as gerrymandering.

NOTES

The silver vote will tell the tale.

Read the Conservative platform.

Next week will see the battle on in earnest.

Vote for the man who will do most for the district.

It's a very uncomfortable place to be--on the fence.

Never put your trust in a fence-jumping politician.

The Pass will poll the largest silent vote in the 22nd.

C. M. O'Brien has been nominated by the Socialists to contest this riding.

The Conservative party are well organized throughout Alberta and are sure of victory.

The Eye Opener suggests that the Rocky Mountain riding elect a mountain goat as their representative.

H. J. Matheson and Mike Ross, the boosters for the Independent candidate, have issued the Blairmore Times this week. The issue is gotten out in English and Lithuanian.

The Independent straddles the fence politicians have no friends in parliament and cannot accomplish anything for their constituents. The Socialist is in the same box.

READ! READ! READ!!!

Professor Charles Morris' Story of

THE

Great Earthquake of 1908

and Other Historic Disasters

The most terrible calamity Nature has ever visited upon mankind.

The destruction of ancient Pompeii was hardly one-hundredth as great.

San Francisco's loss of life was insignificant beside it.

The World Wants the Story

and here is the authentic history of this great tragedy of Nature, with its thrilling details, its scientific lessons, its historic settings, its heart stirring appeals and its marvelous relief.

PINCHER CITY

The battle is on and the
generals are bus.

Will Read is spending a few
days in Fernie, B. C.

Miss Mary Miller, of Cowley,
was a visitor here last week.

Mr. Annable, real estate
agent from Taber, is here on
business.

The aspirants for the Liberal
convention in dwindled down to
two at the last moment.

The entire number of dele-
gates allowing at the Liberal
convention were on hand.

Dr. Warnock is arranging a
series of meetings throughout
the Pincher Creek constituency.

Use "New Life," the world's great-
est guaranteed cure for indigestion.

Mr. McMillan and wife, of
Spokane, Wash., were here last
week looking for a hotel loca-
tion.

Go to Laidlaw's for your
hardware and groceries. The
goods are all and the prices are
right.

The Liberal convention at
Pincher Creek on Monday was
a huge success and went off
without a hitch.

Hon. A. C. Rutherford, of
Edmonton, was in Pincher
Creek Monday to attend the
Liberal convention there.

Use "New Life," the world's great-
est guaranteed cure for indigestion.

Miss Bessie Read has gone to
Fernie, B. C., to live with her
sister there. She will be great-
ly missed by her circle of young
friends.

Quite a number of the young
people of this place went
Summerview last Friday to the
dance there and report a splen-
did time.

The Conservatives in conven-
tion at Pincher Creek nomi-
nated E. J. Mitchell to carry the
standard at the election on
March 22nd.

T. J. Elliott who has been in
Taber all winter, has returned
here again. It is understood
that he will have charge of the
ferry over the Old Man river,
this year.

The moving picture show in
the school house on Saturday
last was not the howling success
expected. The machine was
not in proper working order
and quite a number of the films
were indistinct, this together
with numerous delays were try-
ing on the audience.

INITIATIVE, REFERENDUM AND RECALL

The following paragraphs are taken
from the Conservative platform:

"This convention approves of the
introduction of the initiative or the
power on the part of a specified per-
centage of the electors to originate
legislation and the referendum or the
referring to the popular vote of initia-
tive bills or of bills passed by the
legislature when such reference is
petitioned for by a specified percentage
of duly qualified electors and the recall
of the power on the petition of a
specified percentage of the duly qual-
ified electors to compel the resignation
of any person occupying an elective
office.

The initiative means a method by
which a certain percentage of the elec-
tors, the percentage to be agreed upon,
may propose a measure to be
enacted by the legislature or voted
upon by the people.

The referendum means a method by
which any law may on petition be
referred to the electors for their decision.
It is a method of invoking the opinion
of the ultimate authority, the people,
on any particular enactment passed
by their representatives.

The recall is a method by which
electors may exercise direct control
over a representative. If he acts con-
trary to their will, he may, on petition
of a certain percentage of the electors
of his constituency, be suspended from
office. A new election is then declared,
at which the so-called representative
may stand. The operation of the
initiative and referendum tends to
lessen the necessity for the exercise of
this right.

If you want to see this plank put
into practice, vote for the Conservative
candidate.

A WHISTLER WHIM.

The Artist Wouldn't Argue About His Birthplace or Age.

James McNeill Whistler had no patience with those people who would insist upon inquiring into two details of his biography in which he professed, and professed with some sincerity, that he was not interested. These details were his age and his place of birth.

It was once mentioned in a Parisian paper that Whistler was born in Baltimore. Although this was contrary to fact, Whistler could not be induced to correct it. The mistake was copied over and over again, and angry parties from Massachusetts, accidentally the birthplace of this citizen of the world, wrote him asking him to deny the libel. All he could be prevailed upon to say was, "If it pleases any one to have me born in Baltimore, let me be born in Baltimore." An individual hailing from Lowell, Mass., once apostrophized him in the generally insulting manner which certain people regard as etiquette in addressing a man of genius upon a first introduction.

"Mr. Whistler," said the stranger, "like me, you were born in Lowell, Mass., and you are sixty-eight years of age and I am sixty-seven. I remember—"

The painter interrupted wearily and plaintively: "My dear sir, if you like to be born in Lowell, Mass., and you enjoy being sixty-seven years of age, well and good, but I don't want to be sixty-eight years of age and don't remember being born in Lowell, Mass."

ON AN OCEAN LINER.

It Doesn't Pay to Get Hairy With the Stewards.

"Never, oh, never, speak harsh words of rebuke to a steward on an ocean liner," declared a congressman from New York.

"One summer I journeyed over to the other side. I found that I had to embrace the table leg to get near enough to operate with my knife and fork. For my unpleasant seat I called the steward to order. Most harsh was my criticism. Then I told him I would have my meals served thereafter in the upper cabin."

"The next morning the cabin steward told me of a better room and that I should get it immediately. It was more costly and elaborately furnished than the one I occupied with my traveling companion. Then, too, it was on the main deck. I looked over the new room and decided to change. He had my luggage, with that of my friend, moved below. When my friend found the new quarters he gasped with horror. 'Man alive!' he said. 'You and I are in for a great big sea-sick!'

"I am in for a great big sea-sick! We got every jar of the ship and good and sea-sick too."

"The day I landed the dining room steward met me on the deck. 'Much obliged for changing,' he said. 'It was my regret that the cabin steward got you to move. The gentleman ahead of you in that cabin and who wanted to move gave me \$75 to fix the deal. I think you are worth it as a most glorious tip!'

—Washington Post.

Keenakes. Washington Irving, who wrote the following lines on the value of trifles, evidently believed in them as emblems of friendship.

"There is something, after all, in those trifles that friends bestow upon each other which is an unfailing indication of the place of the giver holds in the affection. 'I would believe that one who preserved a lock of hair, a simple flower or any trifle of my bestowing loved me, though no show made of it, while all the protestations in the world would not win my confidence in one who set no value on such little things. Trifles they may be, but it is by such that character and disposition are oftenest revealed."

—Just For a Change.

"What I want," said the theatrical manager, is a genuine novelty. "Something realistic?" asked the playwright.

"Yes, but I don't want any real pugilists or real naval disasters or real live stock or real battles in it."

Bullfighting in Spain.

It was thought that bullfights were gradually losing their popularity in Spain. The reports for the year 1907 seemed indeed to indicate a distinct tendency in that direction. Those for 1908, however, do not confirm this view. In the course of last year 745 bullfights took place in Spain, and 4,838 bulls were killed in the arena. Before doing some of these bulls managed to leave behind something more than the mere record of death, for it is evidenced that in the contests four of their human opponents were killed and 181 injured.—London Post.

The Hurry Fad.

"Mr. Cleveland," said a Princeton lecturer, "had fine sympathy with the rush and hurry that the American business man so complacently affects—no sympathy with truth and bold declaration, with the hasty telephone, the letter phono-graph, and other bluffs."

"Don't rush us," Mr. Cleveland once said to me. 'Lightning might do a great deal more if it wasn't always in such an awful hurry.'—Washington Star.

A Prince's I.O.U.

An I.O.U. for 23,000 marks was put up at public auction a few days ago at Wiesbaden and fetched the handsome sum of 700 marks. The signature in the interesting document is a well known German prince, and there was an idea, which proved to be ill founded, that his relatives would honor the signature in order to avoid publicity.

KEEP CHILDREN WELL.

An occasional dose of gentle laxative such as Baby's Own Tablets will clear the stomach and bowels of all offending matter, and will keep little ones well and happy. For this reason the Tablets should be kept in every home. Mothers have the guarantee of a government analyst that this medicine contains no opiate or harmful drug. Mrs. Geo. McLean, Springfield, N. S., says:—

"I used Baby's Own Tablets and know them to be a cure for all the minor ills of childhood. I recommend them to all mothers." Sold by medicine dealers or by mail at 25 cents a box under the name of Dr. Williams' Medicine Co., Brockville, Ont.

Once More from The Great West

COMES EVIDENCE OF THE GREAT WORK DONE BY KIDNEY PILLS ARE DOING.

Cyrille Maginel Cured of His Rheumatism and Diabetes by the old Reliable Kidney Remedy.

Findlay, Man. (Special).—Cyrille Maginel, well known farmer living near here, furnishes further evidence of the great work Dodd's Kidney Pills are doing in the West.

"I suffered from Rheumatism and Diabetes," Mr. Maginel says in telling the story of his cure. "My sleep was broken and unrefreshing, and I was tired and nervous all the time. I was treated by a doctor but he failed to cure me. Hearing that Dodd's Kidney Pills were good for brick scald in the urine, led me to try them and after using twelve boxes I am as well as I can possibly be. Dodd's Kidney Pills have made a new man of me and I am thankful."

Dodd's Kidney Pills are no cure-all. They cure sick kidneys and that is all that is claimed for them. But sick kidneys are the root of numerous diseases caused by impure blood. For you can't have pure blood with sick kidneys. It is the work of the kidneys to strain the impurities out of the blood. Dodd's Kidney Pills cure Diabetes because it is a kidney disease; they cure Rheumatism because it is caused by sick kidneys failing to strain the uric acid out of the blood.

So Sweet of Him.

"Hello, old man!" exclaimed Dabney at the literary circle reception. "It's a pleasant surprise to meet you here."

"Good of you to say so, old chap," replied Brown.

"Yes, you see, I was afraid I wouldn't find anybody but bright and cultured people here."—"Catholic Standard and Times."

Repeat it:—"Shiloh's Cure will always cure my coughs and colds."

A Glasgow man, who was seized by violent toothache, did not succumb any too readily to the gas administered for relief. He kept on and on, sleeping peacefully, and the offending molar was removed.

"Ten shillings," said the dentist, after the ordeal was over.

"Ten shillings!" said the dentist. "Ten shillings!" the man exclaimed.

"Yes, sir," said the dentist. "It was an unusually hard job getting that tooth out, and you required twice the ordinary dose of gas."

"Well, here's the money," said the patient. "But mind this—the next time I take gas in your place I'll want to look at the meter."—"Tit-Bits."

Brown—For the corns on my feet, of course. I hope you didn't think my eyes were affected.—Detroit Tribune.

Geraldine—I'd rather have the mink skin coat.—New York Herald.

"I have taken Scott's Emulsion for six weeks and have found it a wonderful remedy. Before I took the Emulsion I had no appetite; was weak; had lost nearly fifty pounds of flesh, and now I eat well and am gaining every day. I find Scott's Emulsion to be very easily digested and a good food for all weak people."—FLORENCE BLEEKER, No. 1 Myrtle Avenue, Bridgeton, N. J.

The loss and recovery of a \$500 pearl necklace related the story of a similar experience which a New York woman had after the last Old Guard ball. She also missed her necklace when she arrived at her home, and the next day it was brought to her by a woman who had shared her carriage on her way home. Handing the necklace to her friend, the under said: "So glad I found it. We always thought they were real."

OBEYED THE DOCTOR.

Did His Best in Keeping a Watch Upon the Patient.

The late Dr. Drummond, the habitant post, once related an amusing anecdote indicative of the simplicity of the rural French Canadian.

He was summing in Megantic county, Que., when, early one evening, he was visited by a young farmer named Ovide Leblanc.

"Bien soir, docteur," said Ovide by way of greeting. "Ma brader Moise, heem ver seek. You come on d'house for see heem, doc?"

Drummond, always kind hearted and obliging, complied with the request of Ovide and found the unfortunate Moise suffering from what he diagnosed as a fairly severe case of typhoid.

"Wishing to provide Moise with some medicine," said the doctor, "I asked Ovide to accompany me back to the village. The prescription compound, I proceeded to instruct Ovide. The dose was to be administered every three hours during the night, and, trying to be as brief, plain and explicit as possible, I said: 'Be sure and keep Ovide on Moise tonight and give him a teaspoonful of this at 9 o'clock, 12 o'clock and at 3 and 6 in the morning. Come and see me about 9 o'clock in the morning.'"

Ovide understood and departed. The following morning he again presented himself, and Drummond asked: "How's Moise? Did you do it as I told you?"

"Ma brader Moise, I think he some better dan las night," replied Ovide. "I give heem de medicine, but I don have no watch in d'house, doc. I tak d'other clock—d'one what mak d'beer dewsturb for net. I keep et on bees clock all night. Tink et doc heem good dat, jus' lak d'watch. Wat you tink doc?"

Teacher—"Now, I want all the children to look at Tommy's hands and observe how clean they are and see if all of you cannot come to school with cleaner hands. Tommy, perhaps, will tell us how he keeps them so nice." Tommy—"Yes, Ma makes me wash the breakfast things every morning."

The Best Liver Pill.—The action of the liver is easily disarranged. A sudden chill, undue exposure to the elements, or overeating in some favorite food, excess in drinking, are a few of the causes. But whatever may be the cause, Farnell's Vegetable Pills can be relied upon as the best corrective that can be taken. They are the leading liver pills and they have superior honor among such preparations.

PINCHER CITY

A good place to live in. No earthquakes to jar your equilibrium, while the citizens of many of the Coast Cities are living in constant fear of being violently shaken by volcanic eruptions. The citizens of Pincher City are living with a feeling of safety from earthquake disturbances, but extend to the terror-stricken citizens living in the earthquake zone their deepest sympathy.

Railway Company asks for Charter to build and operate Railway from Coal Mines to Pincher City

Even this railway news causes no undue excitement in Pincher City, as it has been almost a monthly occurrence during the past year for some company to ask the privilege of building a railway line to Pincher City. It is very probable that this line will be built into Pincher City, and it is very fortunate for this company that the many other companies who have asked for the privilege of building railway lines to Pincher City failed to construct their lines, for if they had done so it would necessitate this company to build a belt line of railway around Pincher City in order to obtain a landing in the City, which would entail an enormous outlay of capital.

Prospects for the Sale of Farm Land and City Property

We have a number of prospective buyers, both for Farm Land and City Property, whom we have been expecting for several weeks, but unfortunately for them they live in sections of the country where, according to newspaper reports, the climatic condition of the country has made life almost unbearable on account of the intense cold weather, which is, no doubt, the cause of their non-appearance in sunny Southern Alberta on schedule time.

While the weather here for the past few weeks might be called cool, especially the nights, it has caused no cessation of business, travel or duty. Many citizens of Pincher City made it their business to travel 20 to 25 miles in making a trip recently to perform the duty of voting for a councillor, and while no boasts are made that the trip was as pleasant as a trip in July to a celebration would be, still it shows what is being done in sunny Southern Alberta while our neighbors in other parts of the country are making a brave struggle to exist on account of the bitter cold weather they are having.

In reply to a number of inquiries we have had to our ad. re Pincher City lots, we have decided to refuse to sell lots in Pincher City to speculators, unless they agree to improve them by building either a residence or a business house. We find that it is imperative for us to make this rule, for if we did not too much of the property would be held by speculators, which would be a detriment to the building up of the town, and we find we will have plenty of buyers who will willingly comply with our rule in the matter of building.

If you are interested in Pincher City to the extent of being willing to buy lots and build, any inquiries re same will receive prompt attention.

We have a fine list of farm land at bargain prices on good terms.

KERRY GOW

On Wednesday, March 17, Joseph
Murphy's masterpiece of Irish plays,
the "Kerry Gow," will be at the
opera house. The story is one appeal-
ing to the best in every man who
loves a love and hates a scoundrel. It
touches the hearts, the sympathies,
the manhood of everybody and is
strong in human interest, strong in
plot, and strong in everything that
moves an audience to enthusiasm.

Each minute tears and smiles mingle
like shower and sunshine to make
a glorious spring of everlasting enjoy-
ment. There is a heart throb and a
shout of praise in every speech. Dan
O'Hara (the Hero) stirs manhood to
the heroic point. It is a play that
has withstood the crucial test of time
and should be seen by everybody.
Among the exciting scenes to be wit-
nessed are the escape of Dan O'Hara
from prison, the blacksmith in his
shop and the flight of the carrier
pigeons.

Seats should be reserved long in ad-
vance for this attraction.
